

## Free Energy Code Training

This hands-on course is designed to provide plans examiners and building inspectors with the knowledge and skills needed to more quickly and effectively enforce the energy code for nonresidential projects.

### Course Objectives:

- Understand the 2013 building energy efficiency standards for nonresidential new construction, additions, and alterations
- Understand the purpose of each of the nonresidential compliance forms and related documents
- Effectively communicate energy efficiency compliance options and requirements to builders and clients
- Apply your knowledge of the standards to typical job tasks
